
13TH MEETING OF THE COMPLIANCE AND TECHNICAL COMMITTEE (CTC)

Panama City, Panama 24-27 February 2026

CTC 13 – Doc 06 rev2 (*rev2, 22Feb*)

Implementation Report – Commission Record of Vessels

Secretariat

1. Summary

This paper provides an update on the implementation of the SPRFMO Commission's Record of Vessels (RoV), with a focus on operational and data quality issues relevant to compliance monitoring. It also outlines how current RoV priorities align with the strategic objectives and outputs of the Data Working Group (DWG) Strategy and the associated two-year Workplan submitted to the CTC and FAC for consideration.

CTC is invited to:

- **Note** the Secretariat's priorities to enhance the Record of Vessels (RoV) by improving data quality and validation, standardising exception and audit reporting, advancing API and security foundations, enabling cross-system reconciliation, and strengthening Member capacity for timely, accurate submissions.
- **Note** the Secretariat progressing RoV reporting and validation enhancements aligned with the DWG strategy and workplan, including strengthened validation controls and improved repeatable reporting.

2. Background

In accordance with paragraph 12 of CMM 05–2025, the Executive Secretary is required to maintain an up-to-date Record of Vessels authorised to fish in the Convention Area and to make a public summary of that Record available on the SPRFMO website. The RoV is actively maintained and serves as a foundational tool for validating fishing authorisations, linking vessels to activity and monitoring data, and supporting consistent compliance reporting across SPRFMO bodies. Both the full RoV and the public summary can be accessed via the SPRFMO website: <https://www.sprfmo.org/web/public/vessel>. Ensuring the accuracy, accessibility, and operational efficiency of this system remains a high priority for the Secretariat.

3. Implementation status and key observations

3.1. Completeness and cross-checking

In line with previous CTC guidance aimed at strengthening validation procedures and ensuring that vessel activity can be reliably cross-checked against current authorisations, the Secretariat has continued to prioritise the completeness and consistency of the RoV submissions and updates.

While progress has been made, there is still significant room for improvements. Most authorised vessels include the required mandatory fields; however, gaps persist in certain fleet segments. One key issue is the absence of stable and standardised vessel identifiers, which are essential for automated integration with monitoring and control systems.

For example, some artisanal vessels lack valid call signs, making it difficult to link them reliably to the Vessel Monitoring System (VMS). Although a temporary technical workaround has been implemented to enable interim linkage, this approach is inefficient and prone to failure, and it does not replace the need for fully complete and standardised vessel identification data.

3.2. Template compatibility and Secretariat support

The Secretariat continues to encounter practical challenges faced by some Members when completing and submitting the RoV templates. These include difficulties related to language, interpretation of data fields, and continued use of outdated spreadsheet formats, which result in unnecessary processing burdens for the Secretariat.

To address these issues, Members are strongly encouraged to use the current SPRFMO RoV templates, which are designed to facilitate standardised, accurate, and efficient data submission. The Secretariat remains available to provide refresher training and technical support upon request, and early engagement is encouraged to prevent delays or errors in submission.

The current data templates can be accessed at: <https://www.sprfmo.int/fisheries/data-2/data-submission>.

4. Planned RoV enhancements and alignment with the DWG Strategy

The ongoing enhancements to the RoV are a core feature of the DWG strategy which more broadly sets a goal to establish an integrated, secure, and transparent SPRFMO data ecosystem that supports compliance monitoring and evidence-based decision-making.

The strategy will see the transition from the current fragmented and semi-manual systems to a unified, automated Fisheries Information Management System. This will integrate RoV, VMS, Catch, Observer, Transshipment and EM data through adoption and use of Application Programming Interfaces (APIs) and secure web services to enable real-time exchange and validation.

The strategy also prioritises automated validation routines, self-service interfaces, dashboards, reconciliation tools, and strengthened access controls so that sensitive information is protected while non-confidential data can be shared transparently.

In that context, the Secretariat's RoV priorities are to:

- Improve RoV workflow quality at source by introducing stronger field-level validation and controlled vocabularies in templates and online workflows, to reduce inconsistent entries and improve interoperability.
- Introduce repeatable exception and audit reporting (e.g., standard “follow-up lists”, and an audit trail/change-log approach) to support between-meeting quality improvement and more consistent CTC reporting over time.
- Progress API and security foundations consistent with the DWG workplan, including strengthening system security with RBAC and delivering production-ready APIs and Member guidance to support more direct digital interaction with RoV services.
- Enable stronger cross-module reconciliation over time, including the planned automated RoV–VMS–Catch–Transshipment reconciliation tooling described in the DWG workplan.
- Build Member capacity through user guides, workshops, and technical assistance to improve the quality and timeliness of submissions and reduce repeated correction cycles.

5. Vessels Authorised and Active in the SPRFMO Area in 2024

CMM 05–2025, Paragraph 13 requires Members/CNCPs to identify the vessels that are actively fishing or engaged in transshipment in the Convention Area (noting that there isn't a requirement to identify other support vessels operating in the Convention Area) Table 1 summarises the vessels that were authorised on the Record of Vessels by Member/CNCP in 2024 and which vessels, by type, were active in the SPRFMO Area. This is based on received submissions, fishing activity, and transshipment data.

As of December 2024, the SPRFMO Record of Vessels included a total of 1,366 Authorised vessels (Annex 1) of which 5998 were active in SPRFMO in 2024.

Table 1: Summary of the authorised SPRFMO Vessels in 2024, and vessels active in the SPRFMO Area, by vessel type.

| Vessels by Member/ CNCP | Authorised Vessels | Vessels active in the SPRFMO Area during 2024 | | | | | |
|----------------------------|-----------------------|---|------------|------------------|-----------------|-------------|------------------|
| | | Carriers | Liners | Trawlers | Trap setters | Motherships | Not specified |
| Australia | 6 | | 3 | | | | |
| Belize | 1 | | 1 | | | | |
